

GREENWAY CAN GROW

A community garden grown at home.

Greenway is excited to announce that we are offering Greenway friends the chance to pilot our home-grown community garden!

Here's how it works:

For the low cost of **\$5.00**, Greenway will deliver to you:

- 1 live plant (Bean, Cucumber, Tomato, Peppers)
- Seedlings (Bean, Cucumber, Tomato, Peppers)
- A grow bucket/pot for your plant
- Soil for your plant
- Tools for taking care of your plants

There also is a facebook group that will be used for participants to connect weekly for learning and sharing thoughts on our gardening.
